About me

I enjoy building **websites** and applications with **React** and **React Native**. I frequently collaborate with team members to bring ideas to life and ensure smooth project execution.

Experience

Frontend Developer | Freelance | July 2021 - Present

My recent freelance projects include two applications for local companies, developed with **React Native** (Android OS) and **TypeScript**. In these projects, I worked with a backend developer to ensure seamless API integration.

During this time, I also created websites for other clients using **WordPress**, **WooCommerce**, and **Astro**.

Frontend Dev. | Brokerland, Seville - Spain (Remote) | Nov. 2018 - July 2021

My responsibilities at Brokerland included creating informative **websites**, dynamic web applications and online stores using **WordPress** and **WooCommerce**.

I also implemented service request forms using **React**. Additionally, I developed an inventory management and control systems using the Laravel Framework, MySQL, **Bootstrap** and **JavaScript**.

Graphic Designer and Frontend Dev. | 2014 - Oct. 2018

In this period, I primarily worked as a graphic designer. Over time, I transitioned into **web design** and **programming**, taking freelance projects for different business. These were my first experiences as a junior developer, where I improved my skills in both design and **frontend** development.
